Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 and 20-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brewer in view of Brackett.

Brewer shows a wheeled support for supporting an automotive part. The support includes a base 14 having rollers, a member 16 extending from the base, and a support assembly 30 having first-fourth arms, the arms have threaded ends.

Brackett teaches that a wheeled support for supporting a vehicle part may have a selectively extensible member extending from the base. The extensible member is a fluid cylinder and is seen to be rotatable relative to the base. Member 23 may be termed a boom.

The Brewer extending member 16 may obviously be a fluid cylinder in view of the disclosure of Brackett. One of ordinary skill in the art would have been motivated to do this in order to conveniently adjust the vehicle part to a desired height. Statements of intended use such as the type of vehicle part to be engaged has no patentable significance. In any case, the Brewer engaging structure is seen to be capable of engaging and supporting a vehicle brake assembly particularly since the engaging arms of are adjustable and would be capable of engaging vehicle parts of a multitude of sizes and shapes.

Claims 11-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/16/05.
